CONTI...

It is open-source with consensus achieved using Defi. It has been launched with a strong focus on Exchangers and scalability, and it enables complete privacy. WPI Token has a Valued Ecosystem around which includes Launchpad, Swap Exchange, Defi Ecosystem, Gaming's , Exchange, and many other components to make the WPI Token Network more efficient.

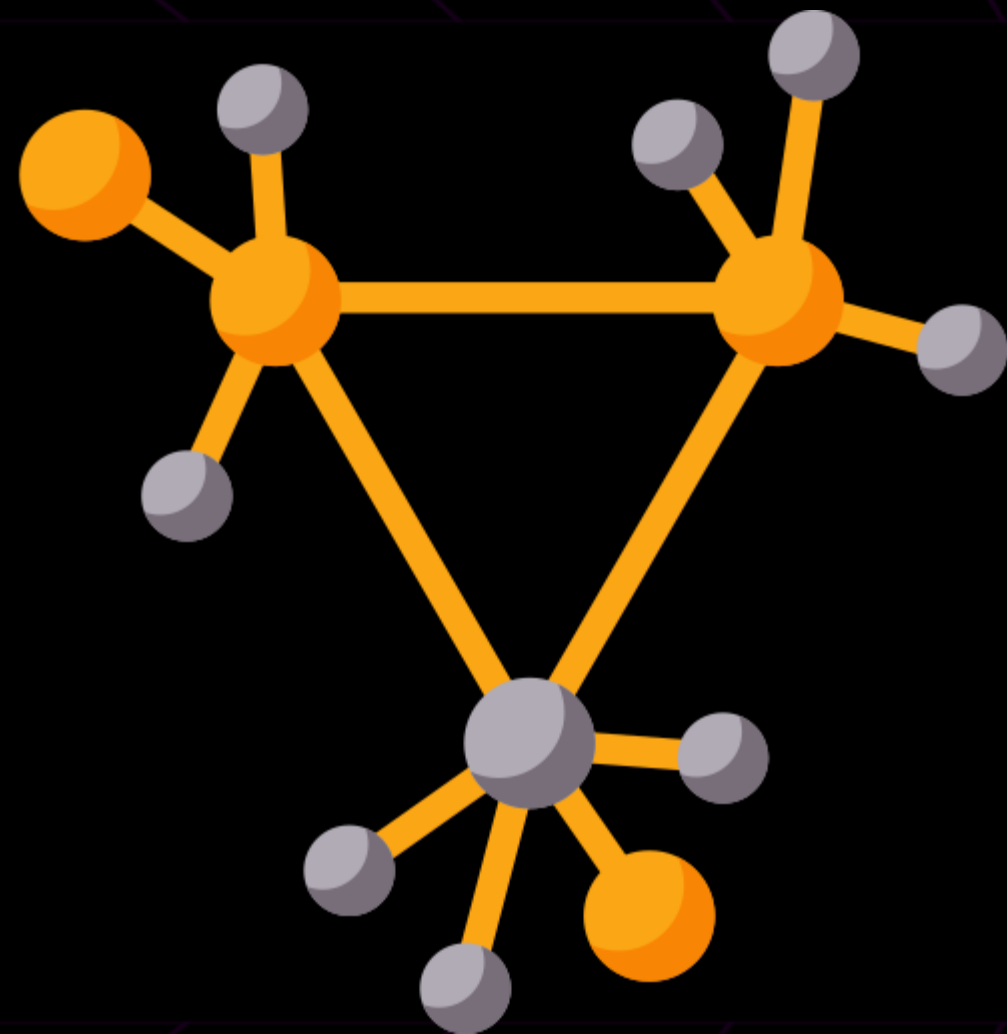

WHY US??

- **World Wide Activities**
Our system is working globally all over world with 100% trust.
- **Safe & Secure**
We are using SSL encryption technology for securing user's Data..
- **Partners**
We work with trusted companies to ensure the security of your investments.
- **Fast Transaction**
Our Transaction speed is very fast.
- **Innovation**
Moving forward in new areas of technological & business innovation with self confidence & passion

DECENTRALIZED

What does "decentralized" mean? What are the advantages and what are the benefits?

Decentralized marketing is created with an automated contract that offers you maximum security and sustainability. A smart contract is an automatic execution algorithm. It exists within the BNB blockchain, the number one cryptographic currency among those with which smart contracts can be created.

Smart contracts, like cryptocurrencies, are decentralized. They work strictly according to the underlying program, without the possibility of subsequently changing the defined execution. The code that contains all the logic of the contract expiration is on the blockchain and all calculations are provided by millions of computers around the world.

This ensures that there is no risk of hacking into the smart contract and stopping the project.

BINANCE SMART CHAIN

Binance is founded on a few essential concepts, the most important of which is decentralization. All data on the Block chain is completely unfettered and is not under the jurisdiction of a central authority. Content creators can receive Binance in return for sharing their work. Additionally, developers can create their own coins on the Binance network. These tokens can then be used in the network's user-created decentralized apps (dApps). Binance main token is used to back the newly issued tokens. The network's ultimate step of development is to support Binance -based games. These games would be totally decentralized, with users rewarding authors directly if they enjoyed the game. Binance's consensus algorithm is referred to as delegated proof of-stake. In this system, transactions are authenticated by 27 super representatives who are responsible for keeping the transaction history. Super representatives are picked every six hours and compensated with a Binance coin created by the system. Every three seconds, a new block is added to the Binance Blockchain.

**An innovative
and safest
place to earn
better**

Extreme Security

Hasten World team tries their best for a fully secured environment as Financial services should be provided with extreme security.

Integrity

Measuring success not just in terms of financial gains but also in terms of the respect, goodwill & credibility we build among all our Stakeholders.
